## Join us this summer!

Our summer surgery program empowers high school students to gain experience in the medical field. Since its inception in 2012, it has evolved into one of the most premier medical summer programs at the high school level.

This is an opportunity for students to discover their passion for medicine. Live operating room case observations are utilized to facilitate critical thinking and creative problem solving with their team.

Students are taught surgical skills, anatomy, and dissection in hands-on workshops and classroom tutorials and then apply this knowledge to real-life surgical cases. They will also have the opportunity to utilize our innovative patient simulation technology and CPR certification course.

### *Did you know?*

Our program has had students from all over the world including Nicaragua, Thailand, China, Switzerland and Canada and even nationally from Chicago, San Francisco, and New York.

**Program Facts:**

- ❖ Students enter OR/Observe surgeries
- ❖ CPR training and BLS certification
- ❖ Medical student and college mentor support throughout the program
- ❖ Fetal Pig Dissection Course
- ❖ Breakfast and Lunch provided daily
- ❖ To apply, we request that each student submit an application and Recommendation Letters
- ❖ Scholarships are available

*"This program introduced me to new friends from international locations and consisted of two weeks that I will undoubtedly never forget. In the future, I hope to continue innovating through a career as a physician."*

**Jasmine W.**  
San Jose, CA

*"I loved the time we got with the suturing and laparoscopic tools. That was what really stood out to me."*

**Fasai P.**  
Thailand

*"I liked visiting the OR and getting to see surgeries performed in real time, learning all those surgical skills like knot tying and suturing, getting the hands on experience with the Da Vinci and the laparoscopic tools, and getting to meet so many smart people in the program and having a fun experience with them."*

**Ronald Y.**  
Irvine, CA

## Few words from Dr. Jaime Landman

### Hello Parents and Students,

As the program creator and chief supervisor, I see firsthand the tremendous impact our program has on youth. Our program is aimed to inspire high school students to pursue their interest in medicine by exposing them to hands-on experiences across several fields of healthcare. The Summer Surgery Program is an opportunity for students to discover their passion for medicine and to promote innovative thinking. We would love to have your child join us this summer!

*-Dr. Jaime Landman, Professor and Chair of the Department of Urology, UC Irvine School of Medicine*
